\* Total Asset Value as at 30 September 2025 (unaudited).

## c) Definitions:

### Standard Deviation

**Standard Deviation** is a measure of risk. It is calculated as any volatility in returns over a period of time. The lower the volatility, the more homogeneous the set of returns.

### Sharpe Ratio

**Sharpe Ratio** is a risk-adjusted performance measure. It is calculated as the difference of the Fund Manager excess return over the risk-free rate, divided by the Standard Deviation. The greater a portfolio's Sharpe Ratio, the better its risk-adjusted performance.

### Tracking Error

**Tracking Error** is a measure of risks. It is calculated as the Standard Deviation between the Fund Manager's return and the Benchmark's return. The lower the Tracking Error, the lower the Fund Manager deviates from the Benchmark.

### Beta

**Beta** is a measure of the average historical sensitivity of the Fund's returns compared to market returns. It is calculated by using the covariance of the Fund and the market on the variance of the market,

### Alpha

**Alpha** measures any excess return achieved by the Fund compared to the performance of the index.

### Information Ratio

**Information Ratio** is a risk-adjusted performance measure. It is calculated as the active return of the Fund Manager, divided by its tracking error. The higher the Information ratio, the higher the Fund Manager ability to generate excess returns per Unit of excess risk.

Entitlement to Cash Distributions Paid during the Reporting Quarter

**According to the Shareholders' Register as at the close of Business on Monday August 18, 2025**

- The Fund Manager will distribute returns on Fund investments, after deducting expenses, provisions and reserves, to Fund Unitholders semi-annually, with the exception of capital gains resulting from the sale of underlying assets, which may be reinvested in other assets or distributed in whole or in part at the Fund Manager's discretion.
- The Fund will distribute dividends within (40) business days after the last day of each semiannual period and at the end of each Gregorian year, i.e. in August and February of each Gregorian year. Any distributed cash returns will be deposited in the Unitholder's investment Account. The Fund Manager may distribute the returns on the Fund's investments, after deducting expenses and provisions, to Unitholders more than twice per year at the Fund Manager's discretion.

\* Dividends for H1 2025 were declared on 12 August 2025 and distributed on 25 August 2025.

## l) Credit Rating of Underlying Debt Instruments of the Fund's Top Ten Investments, as follows:

|                                      |                                                    |
|--------------------------------------|----------------------------------------------------|

\* For the period from 1 January 2025 to 30 September 2025.

\*\* For the period from 30 September 2024 to 30 September 2025.

\*\*\* Not applicable as at the Listing Date of 17 July 2024.

## p) Equations Used to Calculate Performance and Risk:

Standard Deviation  $\sigma p = \sqrt{1/(N-1) \cdot \sum (Rp,i - Rp)^2}$

where  
 $Rp,i$  = Portfolio return in period  $i$   
 $Rp$  = Average portfolio return  
 $N$  = Number of periods

Sharpe Ratio  $[(\text{Average Annualised Return} - \text{Risk Free Rate}) \div \text{Standard Deviation}]$

|                   |                                                                |                                                                                                                                                                                                                                                                         |
|-------------------|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tracking Error    | $TE = \sqrt{1/(N-1) \cdot \sum [(Rp,i - Rb,i) - (Rp - Rb)]^2}$ | <p>where</p> <p>Rp,i = Portfolio return in period i</p> <p>Rb,i = Portfolio return in period i</p> <p>Rp = Average portfolio return</p> <p>Rb = Average portfolio return</p> <p>N = Number of periods</p>                                                               |
| Beta              | $\beta = Cov(Rp, Rb) / Var(Rb)$                                | <p>where</p> <p>Cov(Rp, Rb)= covariance between portfolio and benchmark returns</p> <p>Var (Rb)= variance of benchmark returns</p>                                                                                                                                      |
| Alpha             | $\alpha = Rp - [Rf + \beta * (Rb - Rf)]$                       | <p>where</p> <p>(Rp)= average portfolio return</p> <p>(Rb)= average benchmark return</p> <p>(Rf)= risk free rate</p> <p><math>\beta</math>= portfolio beta</p>                                                                                                          |
